
1 Supervisor Quick-Step Guide: Manage Employee Timesheets

The Time Management module in UKG, more commonly referred to as UTM, is where hourly employees go to clock in & out, as well as request time off. Supervisors of hourly employees are responsible for monitoring the hours worked by their hourly employees, making corrections to the timesheets if needed, and approving timesheets & time off requests each pay period.

UKG Navigation: My Team > Time Management > Attendance > Timesheets

Supervisors may also click the name of the employee from the Attendance > Summary page within UTM to be taken directly to that employee's timesheet.

1.1 View and Approve Time off Requests

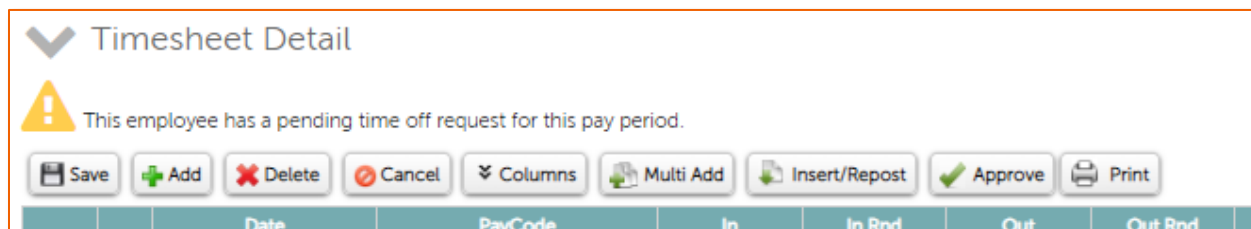

Time off requests must be approved or denied prior to payroll processing to ensure employee timesheets are accurate. There are several ways to access time off requests for hourly employees.

1.1.1 Email Notification

Supervisors will receive an email notification when one of their hourly employees enters a time off request. Supervisors may click the link in the email notification to act upon the request without being required to log in to UKG.

1.1.2 Time Off Alert Link

When viewing an employee timesheet, a time off alert link will appear if there is a pending time off request during the pay period being viewed. Clicking the link takes the supervisor to the Manage Time-Off Requests page where they can take action to approve or deny the request as appropriate.

1.1.3 Manage Time-Off Requests

Within UTM, supervisors may navigate to Scheduler > Requests to access the Manage Time-Off Requests page. From this page supervisors can filter & view time off requests for their entire team.

1.2 Add or Correct an Employee Timesheet Punch

Supervisors can enter time directly to an employee's timesheet to add or correct a punch.

If the employee has a missing 'out' punch, the missing punch can be keyed into the 'out' column of the timesheet. Click 'Save' to keep the changes.

If the employee has a missing 'in' punch or the punches are aligned in such a way that the missing punch cannot be keyed directly into the timesheet, supervisors can utilize the Insert/Repost function.

1.2.1 Insert/Repost

1. Click the 'Insert/Repost' button.
2. In the pop-up window, enter the date(s) & time(s) of the missing punch(es).
3. Click 'OK' to insert the missing punch(es) and realign the employee's timesheet.

1.3.3 Manage Time-Off Requests

Within UTM, supervisors may navigate to Scheduler > Requests to access the Manage Time-Off Requests page. From this page supervisors can filter & view time off requests for their entire team.

1.4 Approve an Employee Timesheet

On the employee timesheet, select the 'Approve' button from the Timesheet Detail section. If there are unsaved changes, the 'Approve' button will remain disabled until the 'Save' button is selected.

Timecards must be approved by 10:00AM CST on the Monday after the pay period has ended.

1.4.1 Delegations

If you are planning on being out of the office on a Monday when timecards are due, please reach out to Payroll or HRIS in advance of your absence & we can assist with delegating your approval functions to another manager.

 **Note:** If you encounter issues not addressed by this user guide, please contact Payroll@realpage.com for additional support.
